\# 我們現時會對固定收益資產的投資之貨幣與相關保單結算之貨幣相配。若固定收益資產並非以相關保單的同一貨幣結算，我們會在可行情況下，儘量利用外匯對沖抵銷匯率波動的影響。股票類別資產則相對享有更大彈性，資產可以投資於其他貨幣，以獲取風險分散效益。此列表的數值為資產作外匯對沖後的分佈比例。

Our current practice is to currency-match our fixed income asset purchases with the underlying policy's currency denomination. If fixed income assets are not denominated in the same currency as the underlying policies, we will enter into currency hedges as much as practically possible to offset any impact from currency fluctuations. In contrast, we give more flexibility to equity-type assets where those assets can be invested in other currencies in order to benefit from diversification. The currency mix shown in this table has reflected currency hedge.

^ 「其他貨幣」主要包括英鎊、澳元及主要亞洲國家的貨幣。

"Others" mainly comprises British Pound Sterling (GBP), Australian Dollar (AUD) and currencies from major Asia countries.
