## Key risks

---

### **How may our credit risk affect your policy?**

The guaranteed cash value (if applicable) and insurance benefit of your plan are subject to our credit risk. If we become insolvent, you may lose the value of your policy and its coverage.

### **How may currency exchange rate risk affect your benefits?**

Foreign currency exchange rates may fluctuate. As a result, you may incur a substantial loss when you choose to convert your benefits to other currencies. Additionally, the conversion of your benefits to other currencies is subject to exchange restrictions applicable at the time when the benefits are paid. You have the sole responsibility to decide if you want to convert your benefits to other currencies.

### **How may inflation affect the value of your plan?**

We expect the cost of living to rise in the future because of inflation. That means the insurance you take out today will not have the same buying power in the future (i.e., the benefit payouts might not be able to cover your future needs) even if the plan offers increasing benefit intended to offset inflation.

### **What happens if you do not pay your premiums?**

You should only apply for this product if you intend to pay all of its premiums. If you miss any of your premium payments, we may terminate your policy and you would lose the policy's coverage.

### **Why may we adjust your premiums?**

We have the right to review and adjust the plan's premium rates for particular risk classes on each policy anniversary, but not for any individual customer.

We may adjust premium rates because of several factors, such as our claims and persistency experience.

Provided that no claim has been made, the customer may cancel the policy by giving written notice to us within 21 calendar days immediately following either the day of delivery of (1) the policy or (2) the notice (informing the availability of the policy and expiry date of the cooling-off period) to the customer or his/her nominated representative, whichever is earlier. After the cooling-off period expires, if a customer cancels the policy before the end of benefit term, the actual cash value (if applicable) may be substantially less than the total amount of premiums paid.
