PRUlife coupon saver

The simple and stable way to help secure you and your family’s financial future

Life & Savings Insurance
When you are saving for something as important as retirement or your children’s education, the simple, stable solutions are often the best. **PRU**life coupon saver gives you regular returns through guaranteed cash coupons and a non-guaranteed terminal dividend. It also safeguards your family finances with life and accidental death cover. We will also pay your plan’s future premiums to maintain your family’s cover if the policyholder unfortunately passes away because of an accident.

**Plan highlights**

- **Guaranteed regular and steady payments until you are aged 100**
- **Flexible payout options to meet your financial needs**
- **Further boost your long-term savings with a non-guaranteed terminal dividend**
- **Pass on your wealth with ease**

- **Financial protection against accidental death**
- **Sign and go – no need for health information**
- **Choice of 5 or 10 years premium terms in USD**
The benefits

Guaranteed regular and steady payments until you are aged 100

Your money grows steadily through a series of guaranteed cash coupons. Each year, starting from the 3rd policy anniversary until you reach age 100, we pay you a guaranteed cash coupon equal to 5% of the notional amount, so you can see your money growing steadily in your PRUlife coupon saver year on year.

We also add extra guaranteed cash coupons, giving you an additional 10% of the notional amount on your policy’s 10th, 15th and 20th policy anniversaries.

Your policy will have a “notional amount”, an amount we use to calculate the premiums, guaranteed cash value, guaranteed cash coupons and other policy values of the plan. This notional amount does not represent the amount of death benefit payable. Any change to this notional amount will lead to a corresponding change in the premiums, guaranteed cash value, guaranteed cash coupons and other policy values of the plan.
Flexible payout options to meet your financial needs
You can simply take your money to use as you wish or leave your guaranteed cash coupons in the plan’s accumulation account to earn non-guaranteed interest.

Further boost your long-term savings with a non-guaranteed terminal dividend
PRUlife coupon saver is a Shareholder-backed Participating Plan that gives you regular returns as well as life and accidental death cover.

The plan not only offers a guaranteed cash value, but also allows your money to grow through a non-guaranteed terminal dividend.

We will pay the guaranteed cash value when you surrender or terminate the policy on or after the 3rd policy anniversary.

We may also pay the non-guaranteed one-off terminal dividend when your policy matures, you surrender it or claim for the death benefit on or after the 3rd policy anniversary.

Please also refer to our brochure on Shareholder-backed Participating Plans available at www.prudential.com.hk/shareholderpar for more information (such as investment philosophy and bonus philosophy) on your Shareholder-backed Participating Plan and the operation of the Shareholder-backed Participating Fund.

Pass on your wealth with ease
So you are free to pass on your wealth as you choose to your family, we will pay a death benefit to your beneficiary if the person covered by the policy (the “life assured”) passes away while the plan is in force.

You can choose how you would like the death benefit to be paid while the life assured is still alive. We can pay the death benefit to your beneficiary in a lump sum or in monthly instalments or a mix of both – it is your choice. These options give you the flexibility to assure your loved ones’ financial future.
Financial protection against accidental death

Accidental death benefit for your family’s financial security
If the life assured has a fatal accident before the end of the premium term, we will help ease the financial burden on your family by paying an extra accidental death benefit. This is equal to 100% of the total basic premiums you paid.

Payor accidental death protection
If the policyholder sadly passes away in an accident before the end of the premium term, we will pay a lump sum equal to the remaining premiums due of their PRUlife coupon saver. This secures your family’s finances at the time need it most. They can use the money as they choose; perhaps to cover future premiums to keep the policy in force.

If the policyholder who passes away in the accident is also the life assured, we will pay the accidental death benefit but not the payor accidental death protection.

Sign and go – no need for health information
You do not need to provide any medical information to take out a PRUlife coupon saver. We only need medical information if your total annualised premium exceeds USD 250,000 for all the PRUlife coupon saver policies taken out under the same life assured in the past 24 months.

Choice of 5 or 10 years premium terms in USD
You can pay your premium for 5 or 10 years whichever fits your financial situation best.

We offer a premium discount if your policy’s notional amount is USD 8,000 or more.

A range of supplementary benefits
We offer a suite of supplementary benefits, including accident, disability, critical illness and medical cover. Some of these require you to undergo medical tests before we can issue the policy, and age restrictions may also apply.
Plan type  
Basic plan

Benefit term  
On the policy anniversary following the life assured’s age 100

Premium term/Issue age/Currency option

<table>
<thead>
<tr>
<th>Premium term</th>
<th>Issue age (age next birthday (ANB))</th>
<th>Currency option</th>
</tr>
</thead>
<tbody>
<tr>
<td>5-year</td>
<td>1 – 65</td>
<td>USD</td>
</tr>
<tr>
<td>10-year</td>
<td>1 – 60</td>
<td>USD</td>
</tr>
</tbody>
</table>

- The life assured must be at least 15 days old when the proposal document is signed.

Premium structure  
Designated premium rate for each premium term. The same premium rate applies across all ages (regardless of gender and smoking class) within each premium term.

Guaranteed cash coupons  
- We will pay 5% of the notional amount on each policy anniversary starting from the 3rd policy anniversary until the end of the benefit term.
- Also, we will pay an extra 10% of the notional amount on your policy’s 10th, 15th and 20th policy anniversaries.

Payout options for guaranteed cash coupons  
You can choose from the following options for your guaranteed cash coupons:
- Accumulation  
  - You can choose to leave the cash coupons in the accumulation account to earn non-guaranteed interest.
- Direct payout  
  - We will pay your cash coupons directly into your HKD bank account in Hong Kong; or
  - We will pay them with a cheque in either HKD or USD depending on your preference.
  - If the cash coupons are paid in HKD, the exchange rate will be determined by us and may vary from time to time.
- Future premium settlement  
  - You can deposit the cash coupons in the premium deposit account to pay your plan’s future premiums and/or any levies.

Accumulation account  
- We may change the annual rate of interest we pay on money in the accumulation account from time to time at our sole discretion. This means the rate is not guaranteed.
- The actual rate depends on several factors. These may include:
  - investment performance;
  - liquidity requirements;
  - policyholders’ withdrawal from the account; and
  - the yields available in the market.
- If interest rates continue to stay low for a persistently long period so that the effective interest rate earned on the accumulation account is less than the rate illustrated in the proposal, the actual accumulation account balance will be lower than we have illustrated.

Terminal dividend  
- The terminal dividend is a one-off non-guaranteed dividend.
- We normally declare dividend annually and according to our declared dividend rates. We may change the dividend rates from time to time. The dividend is not guaranteed. We will declare the dividend for your plan from its 3rd policy anniversary.
- The declared dividend may rise and fall and does not accumulate within the policy or form a permanent addition to the policy’s value.
- We have the right to determine dividend rates and frequency of declaration at our sole discretion.
Factors affecting the terminal dividend

- The dividend we pay is not guaranteed and is subject to review and adjustment at our discretion. Factors that may affect it include (but not limited to):

  i. Investment performance factors – your plan’s performance will be affected by the return on its underlying investment portfolio. This could be driven by:
     - interest earnings from fixed-income securities and dividend from equity-type securities (if any);
     - capital gains and losses from investment assets;
     - counterparty default risk of fixed-income securities (such as bonds);
     - investment outlook; and
     - external market risk factors such as recessions and changes in monetary policies and foreign exchange rates.

  ii. Claims factors – Our historical claims experience on death and/or other covered benefits, and projected future costs of providing death benefit and/or other covered benefits.

  iii. Expense factors – These include direct expenses associated with issuing and maintaining your policy, such as commissions, overrides, underwriting and policy administration expenses. They may also include indirect expenses (such as general overheads) allocated to your policy.

  iv. Persistency factors – Policy persistency and any partial surrenders of a group of policies may impact the dividend we pay to the continuing policies.

- The actual future amounts of benefits and/or returns may be higher or lower than the values currently presented in the marketing materials. Our website at www.prudential.com.hk/bonushistory_SHPAR_en explains the bonus history.

Death benefit and its settlement option

- If the life assured passes away while the policy is still in force, we will pay the beneficiary a death benefit equal to:
  - The higher of:
    - guaranteed cash value plus the terminal dividend (if any); and
    - 105% of the total basic premiums you paid less the total guaranteed cash coupons paid;
    - plus the value of accumulation account (if any);
    - less any outstanding loans and interest.

- Death benefit settlement option:
  - You can decide, while the life assured is still alive, whether we pay your beneficiary the death benefit in a lump sum or as a series of monthly instalments or a mix of the 2. If the death benefit amount you opt to settle by monthly instalments is less than a certain amount, as determined by us, we will only pay the death benefit in a lump sum.
  - You can choose to settle the monthly instalments in a certain number of year options provided by us.
  - If you choose the monthly instalment option, your beneficiary will receive the death benefit of a fixed amount on a monthly basis and earn an interest on the remaining death benefit amount. We will pay the accumulated interest in the last instalment. We will determine the interest rate from time to time. This means the rate is not guaranteed and it depends on several factors including investment performance and the yields available in the market.
  - The beneficiary cannot make any changes to the way we pay the benefits at any time.
  - The remaining balance of the death benefit, which we pay by monthly instalments, will not participate in the Shareholder-backed Participating Fund or benefit from its profits.
Accidental death benefit
- We will pay this if the life assured passes away within 90 days from the date of an accident. The accident must have happened before the end of the premium term.
- We will pay the accidental death benefit but not the payor accidental death protection if:
  - the life assured who passes away in the accident is also the policyholder; or
  - the life assured and the policyholder are different, but pass away in the same accident.
- We will pay the accidental death benefit for each policy once only.
- We will pay the benefit to your beneficiary equal to 100% of the total basic premiums you paid.
- We cap the total benefit amount under all in-force PRUlife coupon saver at USD 125,000 for the same life assured.

Payor accidental death protection
- We will pay this if the original policyholder passes away within 90 days from the date of an accident. The accident must have happened before the end of the premium term.
- We will pay the accidental death benefit but not the payor accidental death protection if:
  - the life assured who passes away in the accident is also the policyholder; or
  - the life assured and the policyholder are different, but pass away in the same accident.
- The protection amount is equal to 100% of the remaining premiums due of your PRUlife coupon saver after the accidental death of the policyholder.
- We cap the total protection amount under all in-force PRUlife coupon saver at USD 125,000 for the same policyholder.
- We will deposit the protection amount in the premium deposit account of the policy for paying the future premiums. You can withdraw this money if you need to.
- We will terminate this benefit when the first of these happens:
  - the ownership of the policy is changed; or
  - the policy has been assigned.

Maturity benefit
When your plan reaches the end of its benefit term, we will pay a maturity benefit equal to:
- the guaranteed cash value;
- plus the terminal dividend (if any);
- plus the value of the accumulation account (if any);
- less any outstanding loans and interest.

Surrender value
When you surrender your policy, we will pay a surrender value equal to:
- the guaranteed cash value;
- plus the terminal dividend (if any);
- plus the value of the accumulation account (if any);
- less any outstanding loans and interest.

Cash value withdrawal
- You can choose to withdraw the guaranteed and non-guaranteed cash value from the policy by reducing the notional amount.
- Because of a reduction in the notional amount, we will also reduce the subsequent premium payments, guaranteed cash value, guaranteed cash coupons, terminal dividend (if any) and total basic premiums paid for the calculation of death benefit, accidental death benefit and payor accidental death protection.

Policy loan
- You can borrow up to 80% of your plan’s guaranteed cash value while keeping the policy in force.
- We will charge interest on policy loans from the date you take them out until they are fully repaid.
- We calculate interest at a rate we determine.
- If you have taken out a loan on your policy, we will use any payouts from it to settle any loans and interest before we pass the remaining money to you.

Total annualised premium
The calculation of the total annualised premium is equal to 100% of the annualised regular premium of the basic plan. When calculating the total annualised premium for the life assured, all policies will be added together.
### Premium discount

Premium discount per USD 1,000 notional amount.

<table>
<thead>
<tr>
<th>Notional amount</th>
<th>≥ USD 8,000</th>
<th>≥ USD 14,000</th>
<th>≥ USD 20,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>5-year premium term</td>
<td>5.9</td>
<td>8.9</td>
<td>10.4</td>
</tr>
<tr>
<td>10-year premium term</td>
<td>3.2</td>
<td>4.8</td>
<td>5.6</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Notional amount</th>
<th>≥ USD 40,000</th>
<th>≥ USD 60,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>5-year premium term</td>
<td>12.4</td>
<td>15.8</td>
</tr>
<tr>
<td>10-year premium term</td>
<td>6.7</td>
<td>8.5</td>
</tr>
</tbody>
</table>

E.g. If the notional amount is USD 50,000, the premium discount for a 5-year premium plan would be USD 620 (USD 50,000 / 1,000 X 12.4).

### Termination of this plan

We will terminate this plan when the first of these happens:

- the death of the life assured; or
- the plan reaches the end of its benefit term (on the policy anniversary following the life assured’s age 100); or
- you fail to pay the premium within the grace period of 1 calendar month from its due date and the net cash value of the policy is insufficient to exercise the automatic premium loan; or
- you surrender the policy; or
- once the total outstanding loans and interest are more than 90% of the guaranteed cash value of this policy.
**Investment strategy**

We aim to protect the rights and manage the reasonable expectations of all Shareholder-backed Participating policyholders. Our investment objective is to maximise policyholders’ returns with an acceptable level of risk. We do this through a broad mix of investments.

The Shareholder-backed Participating Fund invests in various types of assets, such as equity-type securities and fixed-income securities to diversify investment risks. The equity-type securities aim to provide policyholders with the potential for a higher long-term return.

We adopt an actively managed investment strategy, which we adjust in response to changing market conditions. Under normal circumstances, our experts allocate a smaller proportion of higher-risk assets, such as equities, to insurance plans with a higher guarantee and a larger proportion of higher-risk assets to insurance plans with lower guarantees. In doing so, we aim to match the level of risk to the risk profiles of our products. We may utilise derivatives to manage risks or improve returns. We may also make use of securities-lending to enhance returns.

The following paragraphs explain the current investment mix according to our investment strategy. Should there be any material changes in the investment strategy, we will inform you of the changes and explain the reasons behind and their implications.

**The investment mix of your plan**

The current long-term target asset allocation is as follows:

<table>
<thead>
<tr>
<th>Asset type</th>
<th>Allocation (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>USD-denominated policies</td>
<td></td>
</tr>
<tr>
<td>Fixed-income securities</td>
<td>47%</td>
</tr>
<tr>
<td>Equity-type securities</td>
<td>53%</td>
</tr>
</tbody>
</table>

Our guaranteed liabilities to the policyholders are mainly supported by fixed-income securities. The proportion of equity-type securities is also adjusted with reference to market environment. For example, the proportion of equities is generally lower when the interest rate level is low, and higher when interest rates rise (subject to the long-term target equity allocation).

We primarily invest in fixed-income securities rated at least investment-grade. A small portion of high-yield and emerging-market bonds may be included to improve yield and diversification.

For equity-type securities, most of the investments are in stocks listed on major international exchanges.

Our currency strategy is to broadly match the fixed-income securities to the underlying policy denomination, while we allow more flexibility for equity-type securities for diversification. Subject to market availability and opportunity, we may invest fixed-income securities in a currency other than the underlying policy denomination and currency hedging will be used to reduce the currency risk.

We invest globally to achieve diversification benefits and we currently have a higher relative allocation in the US and Asia which will be reviewed regularly.

We actively manage and adjust actual exposure in response to changing market conditions and opportunities. Given asset values may vary due to changes in the economic environment and investment performance, the actual allocation may vary from the target allocation above. On a regular basis, we review the investment mix to be in line with our investment objectives and risk appetite. For more information on the investment mix, please refer to www.prudential.com.hk/investmentmix_en.
Key risks

How our credit risk may affect your policy?
The guaranteed cash value (if applicable) and insurance benefit of your plan are subject to our credit risk. If we become insolvent, you may lose the value of your policy and its coverage.

How currency exchange rate risk affects your return?
Foreign currency exchange rates may fluctuate. As a result, you may incur a substantial loss when you choose to convert your benefits to other currencies. Additionally, the conversion of your benefits to other currencies is subject to exchange restrictions applicable at the time when the benefits are paid. You have the sole responsibility to decide if you want to convert your benefits to other currencies.

What are the risks of surrendering your plan or withdrawing money from your plan?
The liquidity of an insurance policy is limited. You are strongly advised to reserve adequate liquid assets for emergencies. For any surrender/withdrawal especially at the early stage upon policy inception, you may receive an amount considerably less than the premiums you paid.

How inflation affects the value of your plan?
We expect the cost of living to rise in the future because of inflation. That means the insurance you take out today will not have the same buying power in the future, even if the plan offers increasing benefit intended to offset inflation.

What happens if you do not pay your premiums?
You should only apply for this product if you intend to pay all of its premiums. If you miss any of your premium payments, we will automatically settle your outstanding premiums or premiums and levy(ies) by an automatic premium loan, with interest charged at a rate as determined by us. In the case the loan amount (plus accrued interest) exceeds the amount we allow for loan under the policy, we may terminate your policy and you may receive an amount considerably less than the premiums you paid, as well as losing the policy’s coverage.
Important information

Suicide clause
If the life assured commits suicide regardless of sane or insane within 1 year from the effective date of the policy or from the date of any reinstatement, whichever is later, the death benefit will be limited to a refund of the premiums paid without interest subject to the deduction of any amounts we have already paid and any indebtedness you owe us under the policy.

Cancellation right
A customer who has bought the life insurance plans has a right to cancel the policy within the cooling-off period and obtain a refund of any premium(s) and levy(ies) paid less any withdrawals. Provided that no claim has been made, the customer may cancel the policy by giving written notice to us within 21 days after: (1) the delivery of the policy or (2) the issuance of a notice (informing the availability of the policy and expiry date of the cooling-off period) to the customer/his/her representative, whichever is earlier. The premium and levy will be refunded in the currency of premium and levy payment at the time of application for this policy. If the currency of premium and levy payment is not the same as the plan currency, the refundable premium and levy amount in plan currency under this policy will be converted to the currency of premium and levy payment at the prevailing currency exchange rate as determined by us in our absolute discretion from time to time upon payment. After the cooling-off period expires, if a customer cancels the policy before the end of benefit term, the actual cash value (if applicable) may be substantially less than the total amount of premiums paid.

Automatic Exchange of Financial Account Information
Over 100 countries and jurisdictions around the world have committed to adopt new rules for automatic exchange of financial account information ("AEOI"). Under the new rules, financial institutions are required to identify account holders who are foreign tax residents and report certain information regarding their investment income and account balance to the local tax authority where the financial institution operates. When countries or jurisdictions start exchanging information on an automatic basis, the relevant local tax authority where the financial account is maintained will then provide this information to the tax authority of the account holder’s country of tax residence. This information exchange will be conducted on a regular, annual basis.

Hong Kong has adopted the new rules into its legislation (please see the Inland Revenue (Amendment) (No. 3) Ordinance 2016 ("the Amendment Ordinance") which came into effect on 30 June 2016). Therefore, the above requirements will be applicable to financial institutions in Hong Kong including Prudential. Under these rules, certain policyholders of Prudential are considered as "account holders". Financial institutions in Hong Kong including Prudential are required to implement due diligence procedures to identify account holders (i.e. policyholders in case where the financial institution is an insurance company) and in the case where the account holder is an entity, its "controlling persons", who are foreign tax residents, and report this information to the Inland Revenue Department ("IRD") if required. The IRD may transfer this information to the country of tax residence of such account holders.

In order to comply with the law, Prudential may require you, the account holder, to:
(1) complete and provide us with a self-certification form with information regarding your tax residence status, your tax identification number in your country or countries of tax residence, your date of birth, and in the case where the policyholder is an entity (for example, a trust or a company), the classification of the entity that holds the policy and information regarding "controlling persons" of such entities;
(2) provide us all required information and documentation for complying with Prudential’s due diligence procedures; and
(3) advise us of any change in circumstances which affect your tax residence status and provide us with a suitably updated self-certification form within 30 days of such change in circumstances.

According to the due diligence procedures set out in the Amendment Ordinance, self-certifications are required from account holders for all new accounts. As for pre-existing accounts, if a reporting financial institution has doubts about the tax residence of an account holder, it may require a self-certification from the account holder to verify its tax residence.

Prudential cannot provide you with any tax or legal advice. If you have doubts about your tax residence you should seek professional advice. You should seek independent professional advice on the impact that AEOI may have on you or your policy. An account holder who knowingly or recklessly provides a statement that is misleading, false or incorrect in a material particular in making a self-certification to a reporting financial institution is liable on conviction to a fine at level 3 (HKD 10,000).

For further information on the implementation of the Common Reporting Standard and AEOI in Hong Kong, please refer to the IRD website: www.ird.gov.hk/eng/tax/dta_aeoii.htm.
**Notes**
PRUlife coupon saver is underwritten by Prudential Hong Kong Limited ("Prudential"). This brochure is for reference only. It does not represent a contract between Prudential and anyone else. You should read carefully the risk disclosures and key exclusions (if any) contained in this product brochure. For further details and the terms and conditions of this plan, please ask Prudential for a sample of the policy document.

Prudential has the right to accept or decline any application based on the information provided by the policyholder and/or life assured in the application.

Please cross your cheque and make it payable to “Prudential Hong Kong Limited”.

This brochure is for distribution in Hong Kong only. It is not an offer to sell or solicitation to buy or provide any insurance product outside Hong Kong. Prudential does not offer or sell any insurance product in any jurisdictions outside Hong Kong where such offering or sale of the insurance product is illegal under the laws of such jurisdictions.
