就股票類別證券而言，大部分投資於在國際主要證券交易所上市的股票。我們採取全球投資策略，以實現多元化的目標。我們會定期檢討資產的地區組合，而現時相對大部分的資產投資於美國及亞洲。為提高彈性以分散風險，股票類別證券的投資地區並不受限於保單結算貨幣，而可能帶來與保單貨幣不同的貨幣風險。您的保單價值將受到有關股票類別證券結算貨幣與保單貨幣之間的外匯變動所影響。

就固定收益證券而言，我們主要投資於至少達投資級別並以美元結算的選項，亦會視乎市場上的供應及投資機會，投資以美元以外貨幣結算的固定收益證券。我們的長期策略是大致配對固定收益證券的投資貨幣與相關保單的結算貨幣。假如固定收益證券之結算貨幣與保單結算貨幣不同，我們或會利用外匯對沖以減低匯率波動的影響。此列表的數值為資產作外匯對沖後的分佈比例。

For equity-type securities, most of the investments are in stocks listed on major international exchanges. We invest globally with an aim to achieve diversification and we currently have a relatively higher allocation in the US and Asia which will be reviewed regularly. The geographic location of the investment is independent of the underlying policy denomination and may carry a currency exposure different from the underlying policy, to allow for more flexibility for diversification. Your policy values are subject to foreign exchange movements between the currency denominations of the equity-type securities and your policy currency.

For fixed-income securities, we primarily invest in those rated at least investment-grade, and denominated in USD. We may also invest in non-USD denominated fixed-income securities subject to market availability and opportunity. Our long-term strategy is to broadly match the fixed-income securities to the underlying policy denomination. If the currency of the fixed-income securities is different from the underlying policy denomination, currency hedging may be used to reduce the currency risk. The currency mix shown in this table has reflected currency hedge.

[^] 「其他貨幣」主要包括英鎊、澳元及主要亞洲國家的貨幣。

“Others” mainly comprises British Pound Sterling (GBP), Australian Dollar (AUD) and currencies from major Asia countries.
